

Easy-Lam Green™

HEATERS

The **Easy-Lam green™** laminator is designed specifically to provide energy savings to your organization. The **Easy-Lam green™** saves energy in two important ways:

- Standby mode brings thermostat down from laminating temperature of 300°F to 150°F while machine is not being used resulting in an energy savings of over 50%. (Warm-up time from 150°F back to laminating temperature of 300°F is only 7 minutes).
- One hour auto shutoff shuts the machine down resulting in further energy savings when the machine is not in use.

Make the **Easy-Lam green™** your choice for a roll laminator. Your accountant and the planet will be thankful.
